Snow Plow Priority

- First
- Second
- Third

N W E S

During a Snow event, the City of Oak Harbor Public Works Department will Plow, Sand, and apply a de-icing brine to most streets within the City Limits. This map is a general representation of the priority for application of these Snow Removal Treatments. The highest priorities for the City are to ensure that SR-20 and all arterial streets remain passable to best facilitate the delivery of critical services and to best assist drivers. Streets with low volumes (typically residential streets) are treated only as crews and resources are available. The City does not plow privately owned streets or streets owned by the US Navy. The City does not plow parking lots. The safety of the City's staff is of utmost importance and plows may not be deployed on certain public streets with excessive grades as these pose significant risk to crews and equipment.
